**Information for Users on Collection and Disposal of Old Equipment**

This symbol on the products, packaging, and/or accompanying documents means that used electrical and electronic products should not be mixed with general household waste. For proper treatment, recovery and recycling of old products, please take them to applicable collection points, in accordance with your national legislation and the Directives 2002/96/EC.

By disposing of these products correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling.

For more information about collection and recycling of old products, please contact your local municipality, your waste disposal service or the point of sale where you purchased the items.

**[For business users in the European Union]**

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

**[Information on Disposal in other Countries outside the European Union]**

This symbol is only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.
PRECAUTIONS

PLEASE READ CAREFULLY BEFORE PROCEEDING

Please keep this manual in a safe and handy place for future reference.

For AC adaptor

⚠️ WARNING

- This AC adaptor is designed for use with only Yamaha electronic instruments. Do not use for any other purpose.
- Indoor use only. Do not use in any wet environments.

⚠️ CAUTION

- When setting up, make sure that the AC outlet is easily accessible. If some trouble or malfunction occurs, immediately turn off the power switch of the instrument and disconnect the AC adaptor from the outlet. When the AC adaptor is connected to the AC outlet, keep in mind that electricity is flowing at the minimum level, even if the power switch is turned off. When you are not using the instrument for a long time, make sure to unplug the power cord from the wall AC outlet.

For P-45

⚠️ WARNING

Always follow the basic precautions listed below to avoid the possibility of serious injury or even death from electrical shock, short-circuiting, damages, fire or other hazards. These precautions include, but are not limited to, the following:

**Power supply/AC adaptor**

- Do not place the power cord near heat sources such as heaters or radiators. Also, do not excessively bend or otherwise damage the cord, or place heavy objects on it.
- Only use the voltage specified as correct for the instrument. The required voltage is printed on the name plate of the instrument.
- Use the specified adaptor (page 20) only. Using the wrong adaptor can result in damage to the instrument or overheating.
- Check the electric plug periodically and remove any dirt or dust which may have accumulated on it.
- Check the electric plug periodically and remove any dirt or dust which may have accumulated on it.

**Do not open**

- This instrument contains no user-serviceable parts. Do not open the instrument or attempt to disassemble or modify the internal components in any way. If it should appear to be malfunctioning, discontinue use immediately and have it inspected by qualified Yamaha service personnel.

**Water warning**

- Do not expose the instrument to rain, use it near water or in damp or wet conditions, or place on it any containers (such as vases, bottles or glasses) containing liquids which might spill into any openings. If any liquid such as water seeps into the instrument, turn off the power immediately and unplug the power cord from the AC outlet. Then have the instrument inspected by qualified Yamaha service personnel.
- Never insert or remove an electric plug with wet hands.

**Fire warning**

- Do not put burning items, such as candles, on the unit. A burning item may fall over and cause a fire.

**If you notice any abnormality**

- When one of the following problems occur, immediately turn off the power switch and disconnect the electric plug from the outlet. Then have the device inspected by Yamaha service personnel.
  - The power cord or plug becomes frayed or damaged.
  - It emits unusual smells or smoke.
  - Some object has been dropped into the instrument.
  - There is a sudden loss of sound during use of the instrument.
Always follow the basic precautions listed below to avoid the possibility of physical injury to you or others, or damage to the instrument or other property. These precautions include, but are not limited to, the following:

**Power supply/AC adaptor**
- Do not connect the instrument to an electrical outlet using a multiple-connector. Doing so can result in lower sound quality, or possibly cause overheating in the outlet.
- When removing the electric plug from the instrument or an outlet, always hold the plug itself and not the cord. Pulling by the cord can damage it.
- Remove the electric plug from the outlet when the instrument is not to be used for extended periods of time, or during electrical storms.

**Connections**
- Before connecting the instrument to other electronic components, turn off the power for all components. Before turning the power on or off for all components, set all volume levels to minimum.
- Be sure to set the volumes of all components at their minimum levels and gradually raise the volume controls while playing the instrument to set the desired listening level.

**Handling caution**
- Do not insert a finger or hand in any gaps on the instrument.
- Never insert or drop paper, metallic, or other objects into the gaps on the panel or keyboard. This could cause physical injury to you or others, damage to the instrument or other property, or operational failure.
- Do not rest your weight on, or place heavy objects on the instrument, and do not use excessive force on the buttons, switches or connectors.
- Do not use the instrument/device or headphones for a long period of time at a high or uncomfortable volume level, since this can cause permanent hearing loss. If you experience any hearing loss or ringing in the ears, consult a physician.

---

**Location**
- Do not place the instrument in an unstable position where it might accidentally fall over.
- Before moving the instrument, remove all connected cables, to prevent damage to the cables or injury to anyone who might trip over them.
- When setting up the product, make sure that the AC outlet you are using is easily accessible. If some trouble or malfunction occurs, immediately turn off the power switch and disconnect the plug from the outlet. Even when the power switch is turned off, electricity is still flowing to the product at the minimum level. When you are not using the product for a long time, make sure to unplug the power cord from the wall AC outlet.
- Use only the stand specified for the instrument. When attaching it, use the provided screws only. Failure to do so could cause damage to the internal components or result in the instrument falling over.

Yamaha cannot be held responsible for damage caused by improper use or modifications to the instrument, or data that is lost or destroyed.

Always turn the power off when the instrument is not in use.

Even when the [ ] (Standby/On) switch is in standby status (power lamp is off), electricity is still flowing to the instrument at the minimum level.

When you are not using the instrument for a long time, make sure you unplug the power cord from the wall AC outlet.

---

**NOTICE**

To avoid the possibility of malfunction/damage to the product, damage to data, or damage to other property, follow the notices below.

**Handling**
- Do not use the instrument in the vicinity of a TV, radio, stereo equipment, mobile phone, or other electric devices. Otherwise, the instrument, TV, or radio may generate noise. When you use the instrument along with an application on your iPad, iPhone or iPod touch, we recommend that you set “Airplane Mode” to “ON” on that device in order to avoid noise caused by communication.
- Do not expose the instrument to excessive dust or vibrations, or extreme cold or heat (such as in direct sunlight, near a heater, or in a car during the day) to prevent the possibility of panel disfiguration, damage to the internal components or unstable operation. (Verified operating temperature range: 5° – 40°C, or 41° – 104°F)
- Do not place vinyl, plastic or rubber objects on the instrument, since this might discolor the panel or keyboard.

**Maintenance**
- When cleaning the instrument, use a soft cloth. Do not use paint thinners, alcohol, solvents, cleaning fluids, or chemical-impregnated wiping cloths.

**Saving data**
- Some types of data (page 19) will be stored in internal memory, and maintained even if the power is turned off. However, the data could be lost due to malfunction or incorrect operation.

---

**Information**

**About copyrights**
- Copying of the commercially available musical data including but not limited to MIDI data and/or audio data is strictly prohibited except for your personal use.
- This product incorporates and bundles computer programs and contents in which Yamaha owns copyrights or with respect to which it has license to use others’ copyrights. Such copyrighted materials include, without limitation, all computer software, style files, MIDI files, WAVE data, musical scores and sound recordings.
- Any unauthorized use of such programs and contents outside of personal use is not permitted under relevant laws. Any violation of copyright has legal consequences. DON’T MAKE, DISTRIBUTE OR USE ILLEGAL COPIES.

**About functions/data bundled with the instrument**
- Some of the preset songs have been edited for length or arrangement, and may not be exactly the same as the original.

**About this manual**
- The illustrations as shown in this manual are for instructional purposes only, and may appear somewhat different from those on your instrument.
- iPad, iPhone and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries.
- The company names and product names in this manual are the trademarks or registered trademarks of their respective companies.

**Tuning**
- Unlike an acoustic piano, this instrument does not need to be tuned by an expert (although the pitch can be user-adjusted to match other instruments). This is because the pitch of digital instruments is always maintained perfectly.

**With this instrument, you can:**

- Enjoy the feel of an authentic piano action with the Graded Hammer Standard (GHS) keyboard.
- Listen to the ten Piano Preset Songs as background music (page 16).
- Enjoy easy operation by holding down the [GRAND PIANO/FUNCTION] button and pressing the corresponding key on the keyboard to set up the instrument as desired. For more information on keyboard assignments, see page 22.
Thank you for purchasing this Yamaha Digital Piano!
We recommend that you read this manual carefully so that you can fully take advantage of the advanced and convenient functions of the instrument.
We also recommend that you keep this manual in a safe and handy place for future reference.

About the Manuals

This instrument has the following documents and instructional materials.

Included Documents

- Owner’s Manual (this book)
- Quick Operation Guide (page 22)
  Shows in chart form the functions assigned to the buttons and the keyboard for quick understanding.

Online Materials (PDF)

- iPhone/iPad Connection Manual
  Explains how to connect the instrument to smart devices, such as iPhone, iPad, etc.
- Computer-related Operations
  Contains instructions about computer-related functions.
- MIDI Reference
  Contains MIDI-related information.
- MIDI Basics (only in English, French, German and Spanish)
  Contains basic explanations about what MIDI is and can do.

To obtain these manuals, access the Yamaha Downloads website. Select your country, enter “P-45” in the Model Name box, then click [Search].

Accessories

- Owner’s Manual
- AC Adaptor*
- Warranty*
- Online Member Product Registration**
- Footswitch

* May not be included depending on your particular area. Please check with your Yamaha dealer.
** The PRODUCT ID on the sheet will be needed when you fill out the User Registration form.
- Music Rest
Panel Controls and Terminals

1. [ ][ ] (Standby/On) switch ......................page 10
   For turning the power on or setting to standby.

2. [MASTER VOLUME] slider ......................page 11
   For adjusting the volume of the entire sound.

3. [GRAND PIANO/FUNCTION] button ........ page 12
   For instantly calling up the Grand Piano 1 Voice.

   **FUNCTION**
   You can set various parameters by pressing a note on the keyboard while holding this button.

4. [USB TO HOST] terminal ......................page 18
   For connecting to an iPhone, iPad, or computer.

5. [SUSTAIN] jack .................................page 11
   For connecting the included footswitch, an optional footswitch or foot pedal.

6. [PHONES] jack .................................page 11
   For connecting a set of standard stereo headphones.

7. DC IN jack ......................................page 10
   For connecting the power adaptor.

Optional Keyboard Stand

Speakers are built into the instrument at the bottom. Though you can enjoy playing the instrument even when putting it on a desk or table, we recommend that you use an optional keyboard stand for better sound.
Setting Up

Power Requirements

Connect the AC adaptor plugs in the following order.

For the Power Adaptor with a Removable Plug

Do not remove the plug from the power adaptor. If the plug is removed accidentally, slide the plug into place without touching the metallic parts, and then push the plug in completely until it clicks.

Turning the Power On/Off

1. Set the volume to the minimum.
2. Press the [ ] (Standby/On) button to turn on the power.

When the power is supplied to the instrument, the power lamp located on the left of the power switch is turned on. While playing the keyboard, adjust the volume level by using the [MASTER VOLUME] slider. To turn off the power, press the [ ] (Standby/On) switch again for a second.

Auto Power Off Function

To prevent unnecessary power consumption, this function automatically turns the power off if no buttons or keys are operated for approximately 30 minutes. If desired, you can disable or enable this function.

To disable the Auto Power Off function:

When the instrument is turned off:
While holding down the lowest key (A-1), press the [ ] (Standby/On) switch to turn on the power so that the power indicator flashes three times, after which the Auto Power Off function is disabled.

When the instrument is turned on:
While holding down [GRAND PIANO/FUNCTION], press the lowest key (A-1).
To enable the Auto Power Off function:
While holding down [GRAND PIANO/FUNCTION], press the A#-1 key.

Setting the Volume
When you start playing, use the [MASTER VOLUME] slider to adjust the volume of the entire keyboard sound.

Setting the Operation Confirmation Sounds
Because of the simple, piano-like design of this instrument, there are a minimum of panel controls, and most settings are made using the keys of the keyboard. When you turn a function on or off, or change a setting, the instrument produces a sound to confirm the change. There are three types of sounds used: an ascending sound for on, a descending sound for off, and clicks for other settings. For the list of functions assigned to the buttons and keys, see “Quick Operation Guide” on page 22.

Setting the Operation Confirmation Sounds On or Off
You can enable or disable the Operation Confirmation Sounds as desired.
While holding down [GRAND PIANO/FUNCTION], press the C7 key. Every time you press the C7 key, the setting is switched on or off.
Default setting: on

Using Headphones
Any pair of stereo headphones with a 1/4” stereo phone plug can be plugged in here for convenient monitoring. The speakers are automatically shut off when a plug is inserted into this jack.

CAUTION
• To protect your hearing, avoid listening with the headphones at a high volume level for long periods of time.

Using a Footswitch
The [SUSTAIN] jack is for connecting the included footswitch, which works in the same way as a damper pedal on an acoustic piano. Also an optional FC3A foot pedal or FC4A or FC5 footswitch can be connected to this jack. The FC3A lets you use the Half Pedal function.

Half Pedal function
If you are playing the piano with sustain and want a clearer, less muddled sound (especially in the bass register), let up on your foot from the pedal to half position or higher.

NOTE
• Do not press the footswitch when turning the power on. Doing this changes the recognized polarity of the footswitch, resulting in reversed footswitch operation.
• Make sure that power is OFF when connecting or disconnecting the footswitch or pedal.
**Selecting & Playing Voices**

### Selecting a Voice

**To select the Grand Piano Voice:**

Simply press [GRAND PIANO/FUNCTION] to instantly call up the Grand Piano 1 voice — no matter what other voice is called up or other settings are made.

**To select another Voice:**

While holding [GRAND PIANO/FUNCTION], press one of the C0 – A0 keys.

### Voice List

<table>
<thead>
<tr>
<th>Key</th>
<th>Voice Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>C0</td>
<td>GRAND PIANO 1</td>
<td>Recorded samples from a full concert grand piano. Perfect for classical compositions as well as any other style that requires an acoustic piano.</td>
</tr>
<tr>
<td>C#0</td>
<td>GRAND PIANO 2</td>
<td>Bright piano sound. Clear tone helps the sound to “cut through” when playing in an ensemble.</td>
</tr>
<tr>
<td>D0</td>
<td>E. PIANO 1</td>
<td>Vintage electric piano sound of hammer-struck metallic “tines.” Soft tone when played lightly, and an aggressive tone when played hard.</td>
</tr>
<tr>
<td>D#0</td>
<td>E. PIANO 2</td>
<td>An electronic piano sound created by FM synthesis. Good for standard popular music.</td>
</tr>
<tr>
<td>E0</td>
<td>PIPE ORGAN 1</td>
<td>A typical pipe organ sound (8 feet + 4 feet + 2 feet). Good for sacred music from the Baroque period.</td>
</tr>
<tr>
<td>F0</td>
<td>PIPE ORGAN 2</td>
<td>This is the organ’s full coupler sound, often associated with Bach’s “Toccata and Fugue.”</td>
</tr>
<tr>
<td>F#0</td>
<td>STRINGS</td>
<td>Spacious and large-scale string ensemble. Try combining this voice with piano in DUAL.</td>
</tr>
<tr>
<td>G0</td>
<td>HARPSCORD 1</td>
<td>The definitive instrument for baroque music. Authentic harpsichord sound, with plucked strings, no touch response.</td>
</tr>
<tr>
<td>G#0</td>
<td>HARPSCORD 2</td>
<td>Mixes the same Voice an octave higher for a more brilliant, dynamic tone.</td>
</tr>
<tr>
<td>A0</td>
<td>VIBRAPHONE</td>
<td>Played with relatively soft mallets.</td>
</tr>
</tbody>
</table>

**After selecting the desired Voice, play the keyboard.**

**NOTE**

- To familiarize yourself with the characteristics of the Voices, listen to the Demo Songs for each voice (page 16).
- You can shift the Octave as described in the next column (see “Voice 1”).

### Layering Two Voices (Dual)

You can play voices simultaneously across the entire range of the keyboard.

1. **Engage Dual.**
   
   While holding down [GRAND PIANO/FUNCTION], simultaneously press any two desired keys from C0 – A0.
   
   The voice assigned to the left side key is Voice 1, while the Voice assigned to the right side key is Voice 2.

2. **To exit from Dual, simply press [GRAND PIANO/FUNCTION].**

### To shift the Octave for each Voice:

While holding down [GRAND PIANO/FUNCTION], press one of the F5 – A#5 keys.

<table>
<thead>
<tr>
<th>Voice 1</th>
<th>Voice 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>F5</td>
<td>G5</td>
</tr>
<tr>
<td>F#5</td>
<td>A5</td>
</tr>
<tr>
<td>G5</td>
<td>A#5</td>
</tr>
</tbody>
</table>

### To adjust the Balance between two Voices:

While holding down [GRAND PIANO/FUNCTION], press the B5 key to decrease by one, C6 to increase by one, or C6 to set to 0 (equal balance). The setting range is from -6 to +6. Settings above “0” increase the volume of Voice 1, and vice versa.
Playing Duo

This function allows two different players to play the instrument, one on the left and the other on the right, over the same octave range.

1. While holding down [GRAND PIANO/FUNCTION], press the D3 key to engage Duo.
   The keyboard is divided into the two sections with the E3 key as the Split Point.

2. One person can play the left section of the keyboard while the other plays the right.
   Sounds played with the left voice are played from the left speaker, and sounds played with the right voice are played from the right speaker.

3. To exit from Duo, press the D3 key while holding [GRAND PIANO/FUNCTION] again.

To shift the Octave for each Voice:

Same as in Dual (page 12).

Pedal function in Duo

The Footswitch connected to the [SUSTAIN] jack affects both Right and Left sections.

Adding Variations to the Sound – Reverb

This instrument features several Reverb Types that add extra depth and expression to the sound to create a realistic acoustic ambience. Although the appropriate Reverb Type is called up automatically when you select each of the Voices, you can change the Reverb Type as desired.

To select a Reverb Type:

While holding down [GRAND PIANO/FUNCTION], press one of the C5 – E5 keys.

Reverb Type List

<table>
<thead>
<tr>
<th>Key</th>
<th>Reverb Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>C5</td>
<td>Room</td>
<td>Adds a continuous reverb effect to the sound, similar to the acoustic reverberation you would hear in a room.</td>
</tr>
<tr>
<td>C#5</td>
<td>Hall1</td>
<td>For a bigger reverb sound. This effect simulates the natural reverberation of a small-size concert hall.</td>
</tr>
<tr>
<td>D5</td>
<td>Hall2</td>
<td>For a truly spacious reverb sound. This effect simulates the natural reverberation of a large concert hall.</td>
</tr>
<tr>
<td>D#5</td>
<td>Stage</td>
<td>Simulates the reverb of a stage environment.</td>
</tr>
<tr>
<td>E5</td>
<td>Off</td>
<td>No effect is applied.</td>
</tr>
</tbody>
</table>

To adjust Reverb Depth:

While holding down [GRAND PIANO/FUNCTION], press the A4 key to decrease by one, B4 to increase by one, or A#4 to reset to the default value (most suitable value for the current Voice). The higher the value, the deeper the effect.

Default setting: the setting best suited for the current Voice

Setting range: 0 (no effect) – 10 (maximum depth)
Setting the Touch Sensitivity

You can specify the Touch Sensitivity (how the sound responds to your playing strength).
While holding down [GRAND PIANO/FUNCTION], press one of the A2 – C3 keys.

<table>
<thead>
<tr>
<th>Key</th>
<th>Touch Sensitivity</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A2</td>
<td>Fixed</td>
<td>The volume level does not change at all regardless of whether you play the keyboard soft or hard.</td>
</tr>
<tr>
<td>A#2</td>
<td>Soft</td>
<td>The volume level does not change much when you play the keyboard soft or hard.</td>
</tr>
<tr>
<td>B2</td>
<td>Medium</td>
<td>This is the standard piano touch response (default setting).</td>
</tr>
<tr>
<td>C3</td>
<td>Hard</td>
<td>The volume level changes very widely from pianissimo to fortissimo to facilitate dynamic and dramatic expression. You have to hit the keys hard to produce a loud sound.</td>
</tr>
</tbody>
</table>

**NOTE**

- The Touch Sensitivity settings may have little or no effect with the PIPE ORGAN and HARPSICHORD Voices, since these instruments are not normally responsive to keyboard dynamics.

Transposing the Pitch in Semitones

You can shift the pitch of the entire keyboard up or down in semitone in order to facilitate playing in difficult key signatures, or to easily match the pitch of the keyboard to the range of a singer or other instruments.
For example, if “+5” is selected, playing key C produces pitch F, letting you play a song of F major as though it were in C major.

**Setting range:** -6 – 0 – +6

**To transpose the pitch down:**
While holding down [GRAND PIANO/FUNCTION], press the F6 key to decrease by 1 semitone.

**To transpose the pitch up:**
While holding down [GRAND PIANO/FUNCTION], press the G6 key to increase by 1 semitone.

**To restore the original pitch:**
While holding down [GRAND PIANO/FUNCTION], press the F#6 key.
Fine-tuning the Pitch

You can fine tune the pitch of the entire instrument in approximately 0.2 Hz increments. This lets you match the keyboard pitch finely to that of other instruments or CD music.

Setting range: 414.8 – 440.0 – 466.8 Hz

To lower the pitch:
While holding down [GRAND PIANO/FUNCTION], press the G#6 key repeatedly to lower the pitch in approximately 0.2 Hz increments.

To raise the pitch:
While holding down [GRAND PIANO/FUNCTION], press the A6 key repeatedly to raise the pitch in approximately 0.2 Hz increments.

To set the pitch to A3 = 442.0 Hz:
While holding down [GRAND PIANO/FUNCTION], press the A#6 key.

To reset the pitch to the default (A3 = 440.0 Hz):
While holding down [GRAND PIANO/FUNCTION], press the B6 key.
Playing Back Songs

Listening to the Voice Demo Songs

Demo Songs are provided for each of the Voices such as Piano and Organ.

1 While holding down [GRAND PIANO/FUNCTION], press one of the C1 – A1 keys to start playback.

This operation starts playback of the Demo Song of the Voice assigned to the pressed key. Starting with the selected Song, playback will continue in sequence.

2 Press [GRAND PIANO/FUNCTION] again to stop playback.

To adjust the playback tempo:

The operation is same as that of Metronome Tempo (page 17).
Using the Metronome

The metronome is convenient for practicing with an accurate tempo.

1. While holding down [GRAND PIANO/FUNCTION], press the E3 key to start the Metronome.

2. Execute the same operation again to stop the Metronome.

NOTE: Pressing only [GRAND PIANO/FUNCTION] also stops the Metronome, but it also resets to the Grand Piano Voice.

Selecting a Beat

While holding down [GRAND PIANO/FUNCTION], press the E4 key to decrease the value, or the F4 key to increase the value. The default value is "no beat." When a value other than "no beat" is selected, the first beat is accented with a bell sound.

Adjusting the Tempo

While holding down [GRAND PIANO/FUNCTION], press the F3 – D4 keys (to which numbers 0 – 9 are assigned individually) to specify the three-digit value as a Tempo of the Metronome and Song. To specify "95," for example, press the F3 (0), D4 (9) and A#3 (5) keys in order while holding down [GRAND PIANO/FUNCTION].

Default setting (Metronome): 120
Setting range: 32 – 280

To restore the default value:

While holding down [GRAND PIANO/FUNCTION], press the D#4 key.

Adjusting the Volume of the Metronome

While holding down [GRAND PIANO/FUNCTION], press the F#4 key to decrease the volume of the Metronome, the G#4 key to increase the volume, or the G4 to restore the default volume (10).
Setting range: 1 – 20
Connecting Other Equipment

Connecting an iPad or iPhone

With an iPad or iPhone connected to your digital piano, you can use a wide range of apps to expand the functionality of your instrument in exciting new ways. For details on how to connect the devices, refer to the “iPhone/iPad Connection Manual,” which you can download for free from the Yamaha web site.

Connecting to a computer

By connecting a computer to the [USB TO HOST] terminal, you can take advantage of various music software with your computer and the instrument. For details on using a computer with this instrument, refer to the “Computer-related Operations” on the website.

MIDI Settings

Setting the MIDI Transmit Channels

In any MIDI control setup, the MIDI channels of the transmitting and receiving devices must be matched for proper data transfer. You can specify the channel on which this instrument transmits MIDI data. To do this, while holding down [GRAND PIANO/FUNCTION], press one of the D6 – E6 keys. The D6 key decreases the value by 1, the E6 key increases the value by 1, and the D#6 key restores the default value (channel 1).

Setting range: 1 – 16
Default value: 1

Other MIDI Settings

The MIDI settings other than the Transmit Channel are set as listed below, and cannot be changed.

- **MIDI Receive Channels:**
  - All channels (1 – 16)
- **Local Control:**
  - On
- **Program Change Transmit/Receive:**
  - Yes
- **Control Change Transmit/Receive:**
  - Yes
Data Backup and Initializing

The following data will automatically be maintained as backup data even if you turn off the power.

**Backup data**
- Metronome Volume, Metronome Beat, Touch Sensitivity, Tuning, Auto Power Off, Operation Confirmation Sounds on/off

---

**To initialize the backup data:**
While holding down the C7 key (right-most key), turn the power on to initialize the backup data to the factory initial settings.

The power lamp flashes, indicating that the initialization is being executed.

**NOTICE**
- *Never turn off the power while the initialization is being executed.*

**NOTE**
- If this instrument somehow malfunctions or fails to operate properly, try executing the initialization.
Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause and Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The instrument does not turn on.</td>
<td>The instrument has not been plugged in properly. Securely insert the female plug into the jack on the instrument, and the male plug into a proper AC outlet (page 10).</td>
</tr>
<tr>
<td>The instrument is automatically turned off even if no operation is done.</td>
<td>This is normal. This occurs due to the Auto Power Off function (page 10).</td>
</tr>
<tr>
<td>Noise is heard from the speakers or headphones.</td>
<td>The noise may be due to interference caused by the use of a mobile phone in close proximity to the instrument. Turn off the mobile phone, or use it further away from the instrument.</td>
</tr>
<tr>
<td>Noise can be heard coming from the digital piano’s built-in speakers and/or headphones when using it with an iPhone/iPad/iPod touch app.</td>
<td>In order to eliminate the risk of noise from other communication when using the instrument with an iPhone, iPad, or iPod touch, we recommend turning on the device’s Airplane Mode.</td>
</tr>
<tr>
<td>The overall volume is low, or no sound is heard.</td>
<td>The Master Volume is set too low; set it to an appropriate level using the [MASTER VOLUME] slider (page 11).</td>
</tr>
<tr>
<td>The pedal has no effect.</td>
<td>Make sure a pair of headphones or conversion adapter is not connected to the headphones jack (page 11).</td>
</tr>
<tr>
<td>The footswitch (for sustain) seems to produce the opposite effect. For example, pressing the footswitch cuts off the sound and releasing it sustains the sounds.</td>
<td>The polarity of the footswitch is reversed because the footswitch was pressed when the power was turned on. Turn off the power and turn it on again to reset the function. Make sure to not press the footswitch when turning the power on.</td>
</tr>
